Letter of Transmittal

Y.A.B. Dato' Seri Abdullah bin Hj. Ahmad Badawi,
Prime Minister and Minister of Finance,
Malaysia.

Y.A.B. Dato' Seri,

In accordance with the requirements of section 56 of the Takaful Act 1984, I have the honour to submit for presentation to Parliament, the Twentieth Annual Report on the administration of the Takaful Act 1984 and other related matters during the year ended 31 December 2004.

Respectfully submitted,

Zeti Akhtar Aziz
Governor

19 April 2005

Governor's Statement

BANK NEGARA MALAYSIA
CENTRAL BANK OF MALAYSIA

The takaful industry continued to face an increasingly challenging environment in the year 2004. The financial landscape is being constantly reshaped by the forces of globalisation, technological advancements, innovative distribution channels and continuing convergence of financial activities in a more diversified and liberalised financial market. The level of competition has also intensified not only from within the takaful industry, but also from its conventional counterpart. In this challenging environment, the takaful industry sustained its growth in 2004 at 10.8% and 13.5% in terms of aggregate contribution income and takaful fund assets respectively.

In the rapidly changing and competitive financial landscape, a significant challenge for the takaful industry is to advance greater ability to compete effectively in the pursuit to expand the industry. It is therefore imperative for the takaful operators to position themselves with strategic focus that sharpen their competitive edge to respond proactively to the sophisticated and differentiated demands of the more discerning consumers. Improvements in terms of innovation and efficiency in product design and development, enhanced distribution system capabilities, high standard of services and professionalism have now become even more important for the industry to strengthen its position in today's competitive financial landscape. The strengthening of internal capabilities to adjust and adapt to the changing conditions and uncertainties in the marketplace is also a prerequisite to enhance the potential for the industry to capitalise on expanded and new growth opportunities, both domestically and on the global front. Greater investments in human capital development and information technology are an integral part of this process.

Policy initiatives of the Bank have been strategically directed toward building capacity and strengthening the infrastructures for a stronger and vibrant takaful industry that is robust and resilient. A more structured Shariah governance framework has been introduced, whilst significant enhancements have been made to the regulatory framework in the area of accounting and financial disclosure requirements, corporate governance practices and consumer protection infrastructure. In addition, the regulatory requirements relating to bancatakaful have been introduced to promote and leverage on bancatakaful as an important means to reach customers, complementing the existing distribution channels of the industry. The Bank has also embarked on a rigorous Risk-based Supervisory Framework that places greater emphasis on the effectiveness of the board and senior management of a takaful operator in managing and controlling risk exposures to an acceptable level which commensurate with the strength of its capital. Under this framework, the overall risk profile of a takaful operator will be monitored by the Bank on an ongoing basis and more efforts will be focused on the risk areas.

With strengthened infrastructures underpinning its further development, the takaful industry is in a better position to complement its conventional counterpart to hasten the increase of the current insurance market penetration rate of 43%, of which takaful contributed 5.1%. There remains tremendous potential for both the takaful

and insurance sectors to effectively serve the needs of the nation in terms of achieving financial security and improvement in the economic well-being. The ongoing efforts to raise the financial literacy of the public via activities under the Consumer Education Programme and other major events on Islamic finance is vital to the endeavour to increase market penetration. This therefore needs to be vigorously pursued by the industry going forward.

In charting a new chapter of development that advances the takaful industry towards new levels of dynamism, the prerequisites continue to be the unwavering commitment and combined efforts of all relevant parties to build on the progress already made and drive performance to effectively meet the challenges of the new business environment. Ultimately, it is our actions that will take us forward in our quest to develop a competitive, dynamic and resilient takaful industry within the comprehensive Islamic financial system that contributes significantly towards the overall development of our economy. Indeed, this would contribute towards enhancing the prospects to secure balanced development and greater shared prosperity.

Zeti Akhtar Aziz
Governor
19 April 2005

- Performance of General Takaful Business

The Takaful Industry Performance

Overview of the Industry Performance

The takaful industry expanded further in 2004 in tandem with the growth in the domestic economy. All key indicators of the industry showed positive growth as follows:

- Combined family and general takaful net contribution income increased by 10.8% to RM1.1 billion;
- Market penetration¹ of the takaful industry rose to 5.1% in 2004 from 4.5%; and
- Takaful assets expanded by 13.5% to RM5 billion. The market share of takaful in the combined insurance and takaful industry in terms of assets remained at 5.6%, whilst contributions moderated slightly to 5.1% (2003: 5.4%) due to a sharp expansion in the life business of the insurance industry.

Chart 1.1
Net Contributions

Note : Net contributions for years 2000 - 2001 exclude the annuity scheme (SATK) marketed to contributors of the Employees Provident Fund

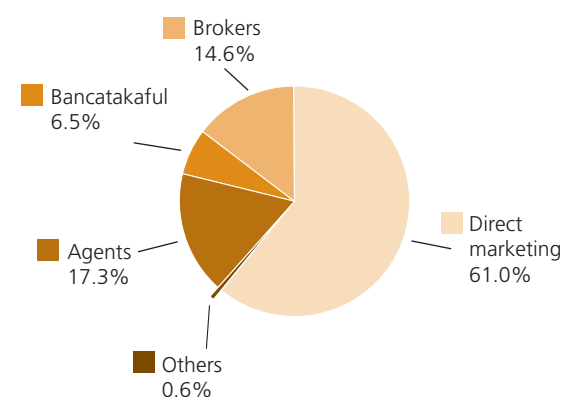

The takaful fund registered a surplus in 2004 despite a sharp increase in claim payments. Total benefits and net claims paid by the takaful industry increased by 34.7% to RM377.3

million, of which RM1 million was in the form of compensation to members affected by the tsunami late in the year.

The industry operates a multi-distribution channel; namely direct marketing, agency force, brokers and bancatakaful:

- Direct marketing remained as the main channel with contributions of RM659.1 million, an increase of 10.2% and representing 61% of contributions;
- Contributions generated through the agency force and brokers increased by 24.1% and 76.5% to RM187 million and RM158.3 million respectively. The agency force was enlarged with the recruitment of 2,513 new agents in 2004; and
- Bancatakaful showed tremendous potential as an effective distribution

Chart 1.2
Contributions by Channels of Distribution

channel based on the experience of a takaful operator, which solely uses this form of distribution channel.

Contributions from bancatakaful arrangements totaled RM69.9 million, of which RM51.1 million was derived from family takaful business.

In 2004, several positive developments in the industry contributed in setting the course

¹ The number of certificates in force divided by total population

for future growth of the takaful sector in Malaysia:

- The implementation of mandatory takaful cover for Islamic financing, in which the cost of coverage constitutes part of the financing package, will lead to greater optimisation in the use of the takaful industry capacity;
- Greater utilisation of bancatakaful arrangements, which leverage on the extensive branching network of the banking and development finance institutions, would further extend the reach of the takaful market and promote better product bundling;
- The completion of the capital raising exercise of each takaful operator to a minimum of RM100 million is expected to improve underwriting capacity and

will precipitate more product launches, which would in turn enhance the dividend yield to shareholders of the takaful operators; and

- Significant demand for investment-linked takaful plan since its introduction in 2003, as reflected in the growth of new business contributions by 197.5% in 2004.

Performance of Family Takaful Business

New Business

Family takaful business continued to grow in 2004, with new business contributions increasing by 18.1% to RM603.7 million, while sums participated expanded sharply by 98.9% to RM36.5 billion. The favourable performance were contributed by the followings:

¹ Include riders

- Tremendous growth of 114.5% in contributions from the group ordinary family takaful plans. Greater focus was directed to further develop business from the group takaful plans, particularly for group temporary and medical takaful;
- Improved demand for investment-linked takaful plans with new contributions increasing by 197.5% amounting to RM9.4 million and involving 2,215 certificates. The plan reflected tremendous potential of expansion in meeting consumer needs for Shariah compliant investment avenues;
- Higher demand for endowment takaful plans with the increase in consumer

inclination towards savings-type takaful plans. Contributions for endowment takaful plans grew by 49.9% to RM81.7 million supported by new product launches during the year;

- Fast expansion in medical and health takaful plans with contributions increasing by 60% to RM57.7 million in

¹ In force contributions reported from 2003 onwards is only for annual contributions
... Negligible

2004. This was supported by the increase in consumer demand to secure protection against the escalation in medical costs;

- The twofold increase of rider takaful plans to RM22.5 million in 2004. Preference for riders² heightened, as the contribution rates were cheaper compared with participating in takaful certificate that provides similar coverage. The coverage provided under the rider takaful plans includes among others personal accident, medical and health and dread diseases; and
- Steady performance of mortgage takaful plans remained the main source of new contributions, contributing

59.8% or RM361.2 million of the new contributions in 2004.

Terminations

A total of RM14.8 billion sums participated involving 132,531 certificates was terminated during 2004. Terminations arising from death amounted to RM85.5 million. The mortality experience remained stable with mortality rate³ of 0.1%. The surrender rate remained relatively unchanged at 2.1%, despite a 25.4% increase in the amount of sums participated terminated. The largest share of certificates surrendered was from annual contributions certificate as opposed to single contributions certificate.

² Riders provide supplementary protection to a basic takaful certificate

2003	731	27,991	19,882	4,324,261
2004	722	46,956	25,327	4,228,446

¹ Average size of contributions in force - contributions in force divided by number of certificates in force

² Average size of sums participated in force - sums participated in force divided by number of certificates in force

Terminations arising from maturity remained small, involving 1,514 certificates with sums participated of RM22.5 million. Terminations due to other causes increased sharply by 111.7% to RM13.3 billion attributable to the withdrawals of individuals covered under the group takaful certificates and expiry of ordinary family temporary takaful certificates.

Business in Force

Business in force continued to sustain its growth throughout 2004 as reflected by the followings:

- Total number of certificates in force rose

Table 1.6
Average Cost of Annual Certificates in Force¹

	2000	2001	2002	2003	2004
	RM				
	Individual	40	36	32	37
Group	7	6	8	6	11

¹ Contributions per RM1,000 of sums participated in force

by 16.5% to 1.3 million units. Certificates in force generated by new takaful operators during the year rose from 12,084 to 50,069 units; and

- Total annual contributions in force increased by 21.1% to RM477.2 million. Endowment takaful plans remained as the dominant sector with a 51.3% share, followed by temporary takaful plans with 26.5% share. Even though the market share of the investment-linked takaful plans is relatively small, the plans showed tremendous potential as reflected by the strong growth of 175.8% in contributions.

Average Size and Cost of Annual Certificates in Force

Ordinary Family Individual Takaful Plans

The size of contributions ranged from RM333 to RM859 and sums participated from

Excess of Income over Outgo	1,117.4	84.5	514.3	64.3	609.7	62.9	437.3	42.5

¹ Management expenses from 2003 onwards include the expenses borne by the shareholders' fund in respect of the family takaful fund

RM3,537 to RM38,103. The overall average size of contributions was largely influenced by endowment takaful plans. This was followed by medical and health takaful plans at an average of RM717 per certificate. The lowest average size of contributions was recorded by individual-others takaful plans. The change in overall average size led to the decline in the average cost per certificate from RM37 to RM29 in 2004.

Ordinary Family Group Takaful Plans

The average size of contributions was RM46,956 and sums participated was RM4.2 million per certificate. The change in average size of certificates led to the increase in average cost from RM6 to RM11. Group annual certificate plans currently consisted of solely endowment takaful plans.

Income and Outgo

Income

Growth of total income of the family takaful business increased marginally by 6.1% to RM1 billion in 2004, impacted by the slowdown in the growth of net investment income from deposit placements and lower yield from Islamic bonds. On the other hand, dividend yield received from investment in equities increased to RM47.7 million. The industry also recorded profits of RM19 million from the disposal of equities.

Outgo

Total outgo of the family fund increased sharply

by 64.5% to RM591.2 million. The significant increase was attributable to the provision of RM41 million for non-performing financing and RM22.5 million for the diminution in the value of securities. Net certificate benefits rose by 42.2% to RM286.4 million, of which 43.9% of payments was for death and disability and 40.9% for surrenders. Agency remuneration increased significantly by 76.5% to RM82.2 million in line with the expansion in the agency force of takaful operators and a restructuring in agency benefits. Management expenses grew by 43.8% to RM86.3 million arising from a general increase in the operational expenses of the fund.

Assets of Family Takaful Fund

Total assets of the family takaful business expanded further to RM4.3 billion, an increase of 11.5% in 2004. Ordinary family takaful fund grew by 16.8% to RM3.1 billion to account for 71.9% of total assets. This was followed by annuity takaful fund with a 27.6% share.

Asset allocation remained relatively unchanged. A substantial portion of the funds were placed in Islamic bonds and Government Islamic instruments so as to match the long-term nature of the family takaful plans, whilst ensuring a steady flow of investment returns. Among the significant developments in 2004 were as follows:

- Islamic bonds accounted for 39% of the takaful fund assets, followed by investment account and Islamic money

Surplus	78.2	83.5	88.5	6.8	6.0

¹ Based on calendar year figures. The figures for the preceding years have been restated

reflective of the current investment yield earned by the takaful fund. Following this, the ratio of participants' fund to valuation liabilities declined to 110.3%, compared to 111.5% in 2003.

As for group accounts, the total surplus increased marginally to RM88.5 million due to an increase in unearned contributions reserves since the bulk of the contributions were generated towards the end of the year. Both the surplus from participants' special account and group account were eligible for distribution as profit to eligible participants according to the agreed profit distribution ratio.

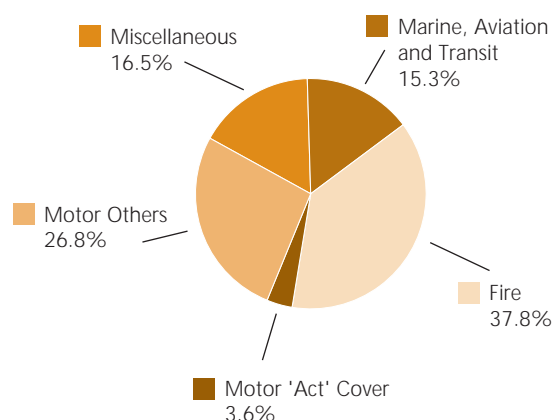

Performance of General Takaful Business

Contributions Growth and Distribution

The general takaful business expanded further in 2004 with total gross contributions increasing by 22.2% (2003: 21.2%) to RM492.5 million, supported by the favourable development in the following sectors:

- Further expansion from the marine, aviation and transit sector following larger co-takaful share secured by a takaful operator on a large risk aviation account. This had lessened the impact of the softening of aviation contribution rates experienced industry-wide;
- Continued growth in the motor sector, driven by the demand for comprehensive motor takaful plans, which led to the overall increase of 24.4% in total gross motor contributions to RM149.8

Chart 1.5
Distribution of Gross Contributions

million. In addition, the new takaful operators further strengthened their market presence through leveraging of agency networks, greater utilisation

of bancatakaful arrangements and introduction of innovative takaful coverage with value added services. By the end of 2004, the market share garnered by the new takaful operators in the motor sector grew to 16.4% of total gross motor contributions, compared with only 2.5% as at end 2003;

- The increase of 11.4% in gross contributions in the fire sector was mainly attributable to the recognition of RM26.7 million contributions from the long-term Federal Treasury fire takaful plans. Under this plan, contributions were received upfront for a period of cover spanning over a few years. The contributions were previously apportioned over the tenure of the plan as opposed to immediate recognition as income. Gross fire contributions excluding contributions from the long-term Federal Treasury fire takaful plans were RM159.5 million; and
- There was a contraction of 21.3% in contributions from the contractors' all risk and engineering sub-sectors arising from

¹ Net claims incurred as a ratio of earned contribution income

the negative growth in the construction sector in 2004. This had thus affected the developments in the miscellaneous sector of the takaful industry.

The fire and motor sectors continued to dominate the portfolio of general takaful business with 37.8% and 30.4% share of total gross contributions respectively. Share of marine, aviation and transit sector increased to 15.3% in line with the increase in business volume.

Net contributions grew further by 30.7% to RM328.6 million compared with RM251.5 million in the previous year. The overall retention ratio however, declined marginally from 81.1% to 80.7% in 2004 arising from the current limited capacity of takaful operators to retain the marine, aviation and transit business.

A total of RM163.9 million was ceded out, of which 52.2% was cessions to Malaysian companies including those operating in the Labuan International Offshore Financial Centre. RM78.4 million was ceded abroad, of which 98.4% was to foreign reinsurers. The largest outflow abroad was from the marine, aviation and transit sector with 65.4% share, followed by the fire sector with 26.3% share. Further development in the retakaful market is necessary to mitigate the high cessions to foreign reinsurers.

Claims Experience

Total gross claims paid increased by 11.5% involving RM116 million with 21.7% or RM25.2 million of the total gross claims paid being borne by retakaful and reinsurance companies under the retakaful arrangement. Claims

2003	58.8	68.0	126.8
2004	93.3	57.4	150.7

¹ The unearned contributions reserves for 2004 includes the portion of reserves in respect of the long-term Federal Treasury fire takaful plans. No adjustments were made for reserves in the preceding years

experience also worsened as reflected by the overall industry claims ratio of 41.2% as the result of increases in provision for outstanding claims for the fire sector and higher net claims paid for the motor sector.

Underwriting Experience and Operating Results

The general takaful fund experienced lower underwriting profit following higher underwriting expenses. Net claims incurred increased by RM22.9 million primarily

attributable to the adverse claims experience in the motor and fire sectors. Management expenses rose to RM74 million mainly attributable to information technology (IT) expenditure as IT infrastructure enhancements were part of the takaful operators' initiative to increase their operational efficiency. The increase in net commissions by 32.9% was commensurate with the higher gross contributions generated by the industry.

Operating profit for the year increased by

22.9% to RM410.2 million. Net investment income generated for the period was RM14.7 million. A substantial portion of the income was from Islamic bonds, investment accounts and Islamic money market. On the other hand, total outgo amounted to RM21.3 million, of which RM11.7 million was for diminution in the value of selected non-performing equities and financing.

Technical Reserves

The technical reserves ratio strengthened to 150.7% compared with 126.8% recorded in the previous year. Total provision for outstanding claims increased by 10.4% to RM188.7 million, of which RM55.5 million or 29.4% was for incurred but not reported claims (IBNR) reserves. The significant increase of

107.4% in unearned contributions reserves was attributable to the inclusion of reserves of the long-term Federal Treasury fire takaful plans.

Assets of General Takaful Fund

Total assets of general takaful business increased by 27.3% to RM723.5 million. Placements in investment accounts and Islamic money market totaled RM236.6 million and accounted for 32.7% share of total assets. Investments in long-term instruments increased by 47.1% to RM265.2 million, of which 62.6% were in Islamic bonds and 37.4% were in Government Islamic Papers. Holdings in Government Islamic Papers were for purposes of compliance with the authorised assets requirement. As at 2004, investments in equities rose to RM82.8 million from RM75.5 million in the previous year.

Policies and Developments

- Policy Direction in 2004
- Supervision of the Takaful Industry
- International Developments

Policies and Developments

I. Policy Direction in 2004

The takaful industry has emerged as one of the vital components of a comprehensive Islamic financial system, capable of effectively contributing to the overall economic growth and financial stability. Efforts continued to be taken to further strengthen the overall infrastructure supporting the development of a resilient and robust takaful industry. During 2004, the policy thrust centred on enhancing the institutional infrastructure, regulatory and prudential framework, Shariah and legal infrastructure, as well as consumer awareness and protection.

Enhancing Institutional Infrastructure

Further progress was made in 2004 to enhance the diversity and capacity of players as part of the broad strategy of enhancing the institutional infrastructure of the takaful industry.

- Approval in principle was granted to a local banking group to conduct takaful business, through the registration of a new subsidiary of the banking group. The move is in line with the need to complement the robust development of the Islamic banking industry, while leveraging on synergies of the existing infrastructures of the banking group.
- Capital raising exercise by takaful operators was completed in 2004 following the directive issued by Bank Negara Malaysia in November 2003, which imposed a minimum paid-up capital requirement of RM100 million for a takaful company. The minimum capital increase was mostly secured through rights and bonus issues. As the capital raising exercise was fully subscribed by the existing shareholders of the takaful operators, no change in control was triggered within any of the takaful operators.

Enhancing Regulatory, Prudential and Operational Framework

Regulatory

The Bank has enhanced the regulatory framework governing the industry through the implementation of several measures which are aimed at strengthening corporate governance practices, improving the transparency of financial reporting as well as the effectiveness of the anti-money laundering framework.

- **The Guidelines on Directorship for Takaful Operators**

The Guidelines were issued to strengthen the effectiveness of the board of directors and senior management in the overall management of a takaful operator. Given the high degree of commitment required from board members, the Guidelines enunciate higher requirements as to the fitness and propriety of directors. The Guidelines specify the requirements relating to the appointment and re-appointment of directors, as well as duties and responsibilities of directors and chief executives that serve to ensure their competence, independence and integrity in managing the affairs of takaful operators.

- **The Guidelines on Related Party Transactions for Takaful Operators**

The Guidelines set out the general standards, practices and procedures to be adopted by takaful operators in relation to dealings with related parties. Additional requirements are imposed for specific transactions relating to payment of dividends, purchase and sale of properties, settlement of contributions and sharing of common resources such as computer systems and physical premises with a related party. These requirements seek to ensure that related party dealings entered into by a takaful operator are fair, reasonable and not prejudicial to the interest of the takaful operator itself, its participants, claimants or creditors. The Guidelines also require

proper disclosure on related party transactions to be made in the statutory annual returns to Bank Negara Malaysia and the monthly returns for the periods ending June and December each year through the Takaful Operators' Statistical System (TOSS).

- **The Guidelines on Financial Statements for Takaful Operators**
The Guidelines were issued to standardise the format for financial reports of takaful operators. By setting out the minimum disclosure requirements of financial statements of takaful operators, the Guidelines aim to improve the comparability and usefulness of the reports, particularly in facilitating assessment of the performance of takaful operators by various stakeholders. The Guidelines were developed drawing from the accounting standards as issued by the Malaysian Accounting Standards Board for insurance, with the necessary modifications on relevant accounting policies for takaful as endorsed by the Bank Negara Malaysia's Shariah Advisory Council (SAC). Takaful operators are required to adopt the minimum disclosure requirements as set out in the Guidelines for financial statements from financial year-end beginning 2004.
- **The Anti-Money Laundering Act 2001 and Verification Procedures**
A minimum guide on verification procedures was introduced to be applied for applications by prospective customers to participate in takaful plans commencing 1 October 2004 with the aim of preventing the takaful industry from being used as a conduit for money laundering activities. The minimum guide was issued to facilitate compliance by takaful operators with Section 16(2) of the Anti-Money Laundering Act 2001 which requires due diligence processes on prospective customers to be performed and properly documented. To reinforce the effort on combating money laundering, Bank Negara Malaysia's supervisory resources are also being channelled to review the adequacy of anti-money laundering measures established at the

supervised entities. The Bank's continuing effort in this area has led to increased emphasis placed by takaful operators in instituting the necessary measures to detect and deter money laundering activities.

Prudential

In an effort to further strengthen the prudential framework governing the takaful industry, the scope of takaful schemes is expanded through the contribution of shareholders in rectifying any deficit in the takaful risk funds. Under this arrangement, shareholders of a takaful operator will be required to make an outright transfer of assets, as and when required and based on the principle of *tabarru'*, into the takaful risk funds. The requirement has been endorsed by the SAC in line with the need to ensure the systemic stability and sustainability of the takaful industry.

Operational

Several important initiatives were taken during the year to promote improvements in market practices and operational efficiency in the takaful industry.

- **New Policy on Takaful Coverage for Islamic Financing**
The policy requires Islamic banking institutions (IBIs) to offer takaful as the first choice of protection for Islamic financing that needs coverage. Exception to the rule is permitted only where the customer's individual preference for conventional insurance was indicated or where takaful coverage is not available in the market. In addition, the use of takaful coverage by the IBIs is mandatory where the cost of coverage, i.e. contribution, constitutes part of the financing package. The policy was formulated upon consultation with the SAC to preserve the integrity of the Islamic financial services industry in terms of its total compliance with Shariah.
- **Greater Utilisation of Technology via JPJ eINSURANS**
An industry-wide initiative was undertaken to improve operational efficiency through on-line submission of motor cover notes by takaful operators to the Road Transport Department

(RTD) for the purpose of road tax issuance. Bank Negara Malaysia had also conducted examinations on the three e-cover notes gateway service providers which provide such services to insurers and takaful operators in order to ensure the readiness of their information technology (IT) systems and infrastructure before the 'live' implementation of JPJ eINSURANS by RTD. The JPJ eINSURANS which was implemented in January 2005 is also expected to eliminate problems relating to forged motor cover notes, and hence, uninsured vehicles on the road as RTD will only recognise e-cover notes.

- **Enforcement of the Cash-Before-Cover (CBC) Requirements**

The statutory requirement of the CBC stipulates that a takaful operator is not permitted to assume any risk in respect of motor takaful unless the contribution payable is received by the takaful operator. To engender greater market discipline in the management of contributions of motor takaful and the issuance of cover notes, takaful operators will now be subject to compound for offences under section 25 of the Takaful Act 1984, and the relevant regulations in respect of direct clients. In addition, takaful operators are required to make adequate provisions for motor contributions outstanding for more than 30 days, instead of six months as previously practised.

- **Centralised Database for Motor Repairs Estimation**

A collaborative effort with the industry was initiated in 2004 to oversee efforts to improve the centralised database on motor parts and labour costs of Motor Research Consortium Sdn. Bhd. (MRC) as used by insurers, takaful operators, adjusters and motor repairers. A joint working committee was formed to undertake this task in line with the need to maximise the use of the database that was first introduced in 2001 to reduce subjectivity in claims estimation.

- **Revised Conditions for Arrangements between Takaful Operators and Vehicle Franchise Holders on Repair of Vehicles**

The conditions that were imposed by the Bank on takaful operators upon granting the approval to enter into arrangements with vehicle franchise holders for repair of damaged vehicles were revised in 2004 in line with market developments. The revised conditions include the requirement to utilise the centralised database of MRC for motor repairs estimation. In addition, takaful operators are advised to stop paying for the promotion of the vehicle franchise holder's customer benefit programme should the franchise holder fails to comply with any of the conditions.

Strengthening Shariah and Legal Infrastructure

During the year, steps were taken to strengthen the Shariah and legal framework for the development of Islamic banking and takaful.

- The Shariah framework is strengthened further with the issuance of the Guidelines on the Governance of Shariah Committee for Islamic financial institutions. The Guidelines are aimed at streamlining the functions and duties of the Shariah Committee of takaful operators as well as enlarging and reinforcing the role of the SAC in order to ensure better Shariah governance in the takaful industry. This followed the amendments made in 2003 to the Central Bank of Malaysia Act 1958 and the Takaful Act 1984 which enhanced the role and functions of the SAC as the sole authority on Shariah matters pertaining to Islamic banking and takaful. The Guidelines also stress on the independence and integrity of the Shariah Committees through the restriction on the appointment of any member of the SAC or a takaful operator's Shariah Committee as a member of another takaful operator's Shariah Committee. This move would benefit the Islamic financial services industry in the long run as it paves the way towards creating and enlarging the pool of qualified and well-

trained Shariah scholars competent in Islamic finance.

- Further amendments were made to the Income Tax Act 1967, the Real Property Gains Tax Act 1976 and the Stamp Act 1949 in accordance with the tax neutrality policy for Islamic banking and finance introduced by the Government in the 2005 Budget. Under the tax neutrality framework, the Inland Revenue Board (IRB) will exempt additional instruments and transactions executed to fulfil Shariah requirement from additional stamp duty and tax payment. Bank Negara Malaysia has been empowered under the laws as the authority to recommend to the IRB to exempt such additional instruments and transactions from stamp duty.

Enhancing Consumer Awareness and Protection

Efforts were also directed at strengthening the consumer protection infrastructure and enhancing financial literacy towards increasing public confidence in the takaful industry.

- **The Financial Mediation Bureau**
The Financial Mediation Bureau (FMB) was established in early 2005 to lend support for efficient dispute resolution process involving the diverse range of financial products and services provided by the financial institutions under the supervision of the Bank. To enhance the consumer redress mechanism at industry level, the FMB will take charge of settling complaints or disputes on banking, insurance, Islamic banking and takaful matters between consumers and the financial institutions. As an integrated mediation bureau with an expanded scope of responsibility, the FMB replaces and combines the functions of the formerly separate establishments for banking and insurance known as the Banking Mediation Bureau and the Insurance Mediation Bureau.
- **Minimum Standard on Product Disclosure and Transparency in Marketing Medical and Health Takaful Plans**
A circular on the minimum standard was issued to specify market conduct

requirements relating to disclosure and the advisory process for adherence by takaful operators and their intermediaries. This is to ensure that prospective consumers are better able to make informed decisions. The focus on achieving best practice standards in marketing medical and health takaful plans is among the efforts to facilitate the orderly development of the medical and health takaful business.

- **Consumer Education Programme**
New educational materials on 'investment-linked takaful' and 'personal accident takaful' were issued under the 10-year Consumer Education Programme (CEP) on insurance and takaful known as 'InsurancelInfo'. The InsurancelInfo is a collaborative effort between the Bank and the insurance and the takaful industries as part of the strategies to raise consumer awareness and appreciation of insurance and takaful. The educational material will be displayed in the InsurancelInfo website and in the form of printed booklets for dissemination to the public.
- **The Malaysia International Halal Showcase (MIHAS) and the Islamic Banking and Takaful Expo (IBTE)**
The inaugural MIHAS and the annual IBTE were organised in 2004 by the Islamic Dakwah Foundation Malaysia and the Association of Islamic Banking Institutions Malaysia respectively. These events, in which the Bank participated, have brought the key stakeholders closer in the development of Islamic finance.

II. Supervision of the Takaful Industry

The comprehensiveness of the Bank's oversight over the takaful industry encompasses the regulatory and supervisory functions. Since 2003, Bank Negara Malaysia had embarked on a strategic shift in its supervisory philosophy and approach, which has resulted in a transformation from a bottom-up, audit-based supervision approach to one that is more holistic and forward-looking. This is achieved via the implementation of Risk Based Supervisory Framework since August 2004.

Risk Based Supervisory Framework

The Risk Based Supervisory Framework (RBSF) is a cyclical, continuous, on-going dynamic process of planning, carrying out specific supervision activities. The RBSF was implemented with the continued aim of ensuring that all supervised entities adopt sound business practices and are financially sound and robust. The new supervisory process uses a structured approach to assess an insurer or takaful operator's risk profile, its financial condition, and the adequacy of its operational management and risk management systems, in order to form an overall assessment of the insurer or takaful operator's health and the likelihood of key risks materialising in the future. Different emphasis is accorded to supervised entities with different risk profiles, which in turn promotes a stronger risk management culture in the industry. To minimise duplication, the Bank would leverage partly on the work done by external and internal auditors, appointed actuaries and other professionals, in respect of the fairness of financial statements, control environment, operational compliance with policies and procedures and adequacy of technical liabilities. This forward-looking approach will enable the Bank to allocate resources optimally, and greater supervisory attention can be given to supervised entities that are systemically important and/or have higher risk profiles.

The risk assessment process begins with identifying the significant activities of the supervised entity, and the inherent risks associated with these activities. This is achieved through continuous off-site monitoring of financial and market information, on-site examinations, as well as dialogues with the senior management of the supervised entity. This will enable the Bank to assess the effectiveness of the entity's risk management systems relative to its risks, as well as the adequacy of its capital and profitability in mitigating the net risks.

In line with Bank Negara Malaysia's focus on consumer protection, supervision on the conduct of insurers and takaful operators will continue to be carried out to ensure that rights of policyholders and the public are appropriately protected. Under the new framework, market conduct supervisions are dealt with separately using a separate supervisory framework. The results of both supervisory processes will be consolidated to reflect appropriately the insurer's or takaful operator's overall position in terms of its financial condition and market conduct.

As part of the supervisory efforts, each supervised entity is also subjected to continuous monitoring of its resilience to economic shocks under stressed conditions. In conjunction with this, insurers and takaful operators are required to submit the results of their stress tests on a half-yearly basis. The stress test incorporates a set of minimum parameters, as prescribed by the Bank with flexibility given to the supervised entities to adopt their own assumptions for certain parameters.

The supervisory activities of the Bank are also focused on several specific areas which are

important to the overall safety and soundness of the supervised entities. These specific areas include the supervision on information systems (IS) and fraud surveillance.

Information Systems Supervision

Bank Negara Malaysia has taken steps to enhance the overall IS governance as well as to promote IS best practices in the supervised entities in response to the rapid development of technology in the insurance and takaful environment. These include on-site examination, off-site monitoring, issuance of guidelines on the management of the IS environment and improving the standards of IS supervision by benchmarking against other proven IS auditing standards. For better assessment of the IS environment and to ascertain the soundness of the IS operations of the insurers and takaful operators, the Bank has enhanced the quality of its IS supervision function by implementing a new methodology for on-site examination, Information Systems Risk Assessment (PRISM). This methodology provides a more balanced appraisal of the IS environment by linking the IS practices and risks to the business requirements and processes. Effort is also being directed at

developing a system to enhance the off-site monitoring function through a database of information on the development and usage of technology by the insurers and takaful operators, which would provide a mechanism for early warning on potential systemic risks and benchmarking of core processes across the insurers and takaful operators.

Fraud Surveillance

A fraud surveillance system has also been put in place, through the Electronic Fraud Information Database System (eFIDS) which captures incidences of fraud in the insurance and takaful industries. The database enables the Bank to identify new modus operandi of frauds and alert the insurance and takaful industries so as to prevent further occurrences of frauds. To reinforce the effort on combating fraud, anti-fraud committees comprising the officials of the Bank and associations representing the insurance and takaful industries were set up in 2004. The committees are responsible to identify and develop recommendations for better coordination and cooperation between the Bank, law enforcement agencies, insurance and takaful associations in their efforts to combat fraud.

The ultimate objective of supervision is to promote a sound and robust insurance and takaful industry, as well as to protect the interest of policyholders and maintain public confidence in the financial system. Going forward, the strategic focus will be on financial surveillance, risk management and market practices, corporate governance, management quality and public accountability as the cornerstones for strengthening the financial resilience of insurers and takaful operators amidst a more competitive and liberalised environment. Efforts continue to be taken to ensure that the supervision approach is appropriate and relevant, and that the Bank is equipped with the necessary skills and capabilities to effectively manage the challenges ahead.

III. International Developments

In 2004, the Bank and the industry players continued to actively participate in initiatives to develop takaful on the global front.

The Bank Negara Malaysia-Islamic Development Bank (IDB) Memorandum of Understanding

The memorandum of understanding (MoU) between the Bank and the IDB was signed on 30 June 2004 which among others seek to promote and expand takaful and retakaful businesses among the Organisation of Islamic Conference (OIC) member countries. Specific measures have been identified to be undertaken collaboratively by both parties. Focus will be directed at promoting ASEAN Retakaful International (L) Ltd. as the main retakaful operator for OIC member countries. With the signing of the MoU, the Malaysian takaful operators are expected to play a more active role in venturing abroad.

Developing Eight (D-8) Cooperation

Progress was made in the D-8 countries initiative during the inaugural meeting convened by the Bank on 13 July 2004 to set up a mechanism for cooperation in the development on takaful among the regulatory and supervisory authorities of the D-8 countries. The meeting agreed on the setting up of two working groups in the areas of education and training as well as financial infrastructure development to be led by Malaysia and Egypt, respectively.

ASEAN Retakaful International (L) Ltd. (ARIL)

Efforts were continued to reinforce the position of ARIL as the main retakaful operator for the D-8 and OIC countries. A key initiative towards this end was the partial completion of the capital raising exercise by way of bonus and rights issues to existing shareholders. The exercise had resulted in an increase in the paid-up capital of ARIL to USD14 million from USD4 million. Following the move to strengthen its financial position and business capacity, ARIL has laid out plans to further increase its capital to USD60 million by 2008.

- November
November
- JPIT/GPT 1 – Garis Panduan mengenai Jawatan Pengarah bagi Pengendali Takaful dikeluarkan. Garis Panduan ini menggariskan peraturan, peranan utama dan tanggungjawab berkaitan pelantikan pengarah dan ketua eksekutif bagi memastikan pengendali takaful diuruskan oleh lembaga pengarah yang berkesan.
JPIT/GPT 1 – Guidelines on Directorship for Takaful Operators were issued. The Guidelines set out the rules, major duties and responsibilities relating to the appointment of directors and chief executives of takaful operators to ensure that takaful operators are governed by an effective board of directors.
- JPIT/GPT 7 – Garis Panduan mengenai Urus Niaga Pihak Berkaitan bagi Pengendali Takaful dikeluarkan. Garis Panduan ini menggariskan keperluan melapor urus niaga dengan pihak berkaitan bagi memastikan urusniaga dijalankan dengan bebas dan telus serta berpandukan terma yang adil dan saksama. Ini selaras dengan usaha mempertingkatkan tahap tadbir urus korporat dalam industri takaful.
JPIT/GPT 7 – Guidelines on Related Party Transactions for Takaful Operators were issued. The Guidelines were issued to set out the reporting requirements of related party transactions to ensure that they are conducted in an independent and transparent manner and on terms that are fair and reasonable. This is in line with the efforts to improve the level of corporate governance in the takaful industry.
- JPIT/17/2004/TO – Pekeliling mengenai Penetapan Suntikan Aset (Tabarru') daripada Pemegang Saham bagi Ketidakcukupan Aset Dana Takaful dikeluarkan. Pekeliling ini memaklumkan keputusan Majlis Penasihat Syariah Bank Negara Malaysia untuk Perbankan Islam dan Takaful bahawa pemegang saham pengendali takaful bertanggungjawab untuk memastikan keupayaan dana takaful memenuhi tuntutan peserta atas manfaat pelan takaful. Tanggungjawab ini dilaksanakan melalui suntikan aset daripada dana pemegang saham sebagai sumbangan tabarru' oleh pemegang saham apabila berlakunya ketidakcukupan aset dana takaful.
JPIT/17/2004/TO – Circular on Requirement on Injection of Asset (Tabarru') from the Shareholders' Funds for Inadequacy of Asset in the Takaful Funds was issued. The circular informed the decision of the Shariah Advisory Council of Bank Negara Malaysia that the takaful operators' shareholders are responsible for ensuring the ability of the takaful funds to meet the claims of their participants on the benefits of the takaful plans. The responsibility is carried out via injection of assets from the shareholders' funds as tabarru' by the shareholders when there is inadequacy in the asset of the takaful funds.

TAKAFUL AM**GENERAL TAKAFUL**

Caruman Bersih <i>Net Contributions</i>	Caruman kasar tolak semua caruman takaful semula yang kena dibayar. <i>Gross contributions less all retakaful contributions payable.</i>
Caruman Langsung Kasar <i>Gross Direct Contributions</i>	Caruman berdasarkan kadar kasar asal yang dikenakan atas pelanggan bagi perniagaan takaful langsung tanpa sebarang potongan komisen atau brokeraj. <i>Contributions on original gross rate charged to clients in respect of direct takaful business without any deduction for commission or brokerage.</i>
Fasal Purata <i>Average Clause</i>	Menetapkan bahawa kadar bahagian kerugian yang ditanggung oleh kumpulan wang takaful bergantung pada jumlah nilai dilindungi kepada jumlah nilai risiko. <i>Stipulates that a takaful fund is only liable for such proportion of the loss as the sum covered bears to total value at risk.</i>
Indemniti <i>Indemnity</i>	Pemulihan kerugian kepada pihak yang menuntut dengan cara bayaran, pembaikan atau penggantian. <i>Restoration to the claimant of a loss by payment, repair or replacement.</i>
Kerugian Menyeluruh <i>Total Loss</i>	Kerugian yang cukup besar sehingga boleh dianggap tidak bernilai lagi. <i>A loss of sufficient size so that it can be said there is nothing left of value.</i>
Kerugian Tertanggung Tetapi Tak Dilaporkan <i>Incurred But Not Reported (IBNR)</i>	Kerugian yang telah berlaku sepanjang tempoh yang ditetapkan, kebiasaannya bagi satu tahun kewangan, tetapi masih belum dilaporkan kepada pengendali takaful semasa tarikh pertimbangan. <i>Losses which have occurred during a stated period, usually a financial year, but have not yet been reported to the takaful operator as of the date under consideration.</i>
Keuntungan/Kerugian Pengunderaitan <i>Underwriting Profit/Loss</i>	Pendapatan caruman terperoleh tolak tuntutan bersih kena dibayar, komisen dan perbelanjaan pengurusan. <i>Earned contribution income less net claims incurred, commissions and management expenses.</i>
Nisbah Bendungan <i>Retention Ratio</i>	Nisbah caruman bersih kepada caruman langsung dan caruman takaful semula diterima kasar tolak takaful semula dalam Malaysia. <i>The ratio of net contributions to gross direct and retakaful accepted contributions less retakaful within Malaysia.</i>
Nisbah Tuntutan <i>Claims Ratio</i>	Nisbah tuntutan bersih yang kena dibayar kepada caruman terperoleh. <i>The ratio of net claims incurred to earned contributions.</i>
Pendapatan Caruman Terperoleh <i>Earned Contribution Income</i>	Caruman bersih tolak peruntukan untuk rizab bagi caruman tidak terperoleh pada akhir tahun campur rizab bagi caruman tidak terperoleh pada awal tahun. <i>Net contributions less provision for reserves for unearned contribution (RUC) at the year-end plus the RUC at the beginning of the year.</i>

Glosari Istilah Takaful*
Glossary of Takaful Terms*

Rizab bagi Caruman Tidak Terperoleh <i>Reserves for Unearned Contribution</i>	Caruman yang sudah diterima bagi risiko yang belum tamat tempohnya pada akhir tempoh perakaunan. <i>Contribution already received in respect of risks which are still unexpired at the end of the accounting period.</i>
Takaful Am <i>General Takaful</i>	Perlindungan kepada peserta bagi kerugian akibat berlakunya malapetaka seperti kemalangan, kebakaran, banjir, liabiliti dan kecurian. <i>Protection to participant for losses arising from perils such as accident, fire, flood, liability and burglary.</i>
Triti Fakultatif <i>Facultative Treaty</i>	Kontrak takaful semula yang memperuntukkan bahawa pengendali takaful yang mengesid mempunyai pilihan untuk mengesid dan pengendali takaful semula mempunyai pilihan untuk menerima atau menolak sesuatu risiko. <i>A retakaful contract under which a ceding takaful operator has the option to cede and the retakaful operator has the option to accept or decline individual risks.</i>
Triti Lebihan Kerugian <i>Excess of Loss Treaty</i>	Sejenis triti takaful semula yang memperuntukkan bahawa pengendali takaful semula membayar semua atau peratusan yang ditentukan terhadap kerugian yang timbul akibat kejadian atau peristiwa tertentu (seringkali berbentuk lebih hampir kepada malapetaka) melebihi amaun yang ditetapkan dan sehingga ke suatu had yang ditetapkan. <i>A type of retakaful treaty which provides that the retakaful operator pays all or a specified percentage of a loss arising from a particular occurrence or event (frequently of a more or less catastrophic nature) in excess of a fixed amount and up to a stipulated limit.</i>
Triti Proposional <i>Proportional Treaty</i>	Kontrak antara pengendali takaful dengan pengendali takaful semula untuk menyertai dengan sama rata dalam pembahagian caruman dan kerugian atas setiap risiko yang tertakluk di bawah skop kontrak tersebut. <i>A contract under which a takaful operator and a retakaful operator participate proportionately in the contributions and losses on every risk that comes within the scope of the contract.</i>
Tuntutan Bersih Kena Dibayar <i>Net Claims Incurred</i>	Tuntutan bersih dibayar tolak peruntukan untuk tuntutan belum dibayar pada awal tahun campur peruntukan bagi tuntutan belum dibayar pada akhir tahun. <i>Net claims paid less provisions for outstanding claims beginning of the year plus provisions for outstanding claims at the end of the year.</i>
