Promoting a Progressive and Inclusive Islamic Financial System

The Bank remains committed to advancing Islamic finance with focused efforts on supporting a sustained economic recovery, building social and climate resilience as well as empowering halal trade.

In 2020, the Bank dedicated efforts towards advancing Islamic finance in addressing the economic challenges posed by the pandemic. The focus was on enhancing the contribution of Islamic finance towards facilitating economic recovery, building social resilience, promoting climate resilience, as well as empowering trade, business and the digital economy.

The Islamic banking and takaful industry remained resilient and agile against the background of a highly uncertain economic and operating environment. The industry continued to post a healthy growth, gaining further market share of the overall financial system. The industry also recorded strong financial soundness indicators (Diagram 1).

Cushioning the impact of COVID-19 to businesses and households

The Islamic banking and takaful industry has been proactive in assisting customers affected by the pandemic. This was supported by an active role of the Shariah Advisory Council of Bank Negara Malaysia (the SAC) which issued key rulings during the year to guide the implementation of assistance measures in line with Shariah principles. Almost half of the 15 SAC meetings in 2020 were dedicated to discussing Shariah matters related to COVID-19 relief measures. The rulings (Diagram 2) focused on reducing financial hardships experienced by customers affected by the pandemic.

These rulings were also a focal point of discussion at the Centralised Shariah Advisory Authorities in Islamic Finance meeting hosted by the Central Bank of the UAE in May 2020. It brought together 40 Shariah scholars and Islamic finance experts from seven jurisdictions, which have national-level Shariah governance similar to the SAC, and international standard-setting organisations. The discussion helped to enrich mutual understanding within the global Shariah fraternity on different practices, challenges and considerations underpinning the rulings in handling financial assistance programmes, particularly in relation to repricing adjustments following the implementation of deferred payments.

In Malaysia, the Shariah committee of Islamic financial institutions complement the functions of the SAC. In particular, the Shariah committees advise on the application of SAC rulings or standards on Shariah matters that are applicable to the operations, business, affairs and activities of the Islamic financial institutions. Given this important role, the Bank introduced a multi-faceted competency framework in 2020 (Diagram 3) for Shariah committees. The framework further elevates the quality of deliberation of Shariah committees and promote sound decision making at the respective institutions. In 2020, the Bank approved a total of 117 Shariah committee appointments proposed by Islamic financial institutions, comprising 45 new appointments and 72 re-appointments.

• Enabling ecosystem for Islamic fintech. |
Encouraging inclusive and diverse financial solutions

During the year, the Bank focused its developmental initiatives for Islamic finance on three major themes:
- Building social resilience
- Promoting climate resilience
- Empowering trade, business and the digital economy

Building social resilience
The Islamic banking and takaful industry continued to advance the social finance agenda through product innovation and service improvements (Diagram 4). Social finance refers to financial services that mobilise philanthropic capital using instruments such as donation, endowment (including cash waqf) or alms (zakat) to deliver tangible social outcomes.
In 2020, the industry introduced new products designed to meet the specific needs of the underserved segment. These include benevolent microfinancing for B40 entrepreneurs funded by donations from corporates and affordable financing programmes to build houses for zakat recipients. There was also financial protection for hardcore poor families in the form of takaful riders using donation.

Further integration of social finance requires Islamic financial institutions to work closely in partnership with State Islamic Religious Councils (SIRCs) and non-traditional partners such as social enterprises and NGOs. The partnership enables each stakeholder to contribute unique expertise, knowledge and resources towards achieving the common goal of enhancing the financial and social resilience of the target groups (Diagram 5). An example of a successful synergistic partnership of this nature is myWakaf, a digital cash waqf platform piloted by six Islamic banks involving eight SIRCs, which managed to raise funds totalling RM7.6 million by the end of 2020. The funds were channelled to finance impactful projects nationwide in healthcare, education and community empowerment (Diagram 6).

The spotlight article on Empowering B40 Entrepreneurs via iTEKAD showcases an example of a pilot programme that utilises social finance instruments to complement existing financial solutions. The Bank will continue to monitor the progress and impact derived from the social finance initiatives by the industry. We will also assess any regulatory or developmental responses that should be considered to strengthen the ecosystem to support a more resilient and vibrant social finance in Malaysia.

Empowering B40 Entrepreneurs via iTEKAD

Over the years, the Bank has been encouraging the innovative use of social finance instruments in Islamic finance. These instruments such as waqf (endowment), zakat (alms) and sadaqah (donation) offer unique benefits in addressing the financial needs of underserved communities, especially the lower income group. The pandemic creates opportunities for the Bank to expand social finance initiatives further to minimise the economic impact of the pandemic on employment and micro businesses. The combination of financial solutions with these instruments is complementary to existing financing programmes for micro-entrepreneurs and aims to help them rebuild their livelihoods after experiencing distressing economic changes.

In March 2020, the Bank initiated a pilot programme called “iTEKAD” (which stands for “my determination”). The iTEKAD programme blends social finance with microfinancing and structured training. This programme aims to empower low income micro-entrepreneurs to generate more sustainable income, become financially resilient and subsequently contribute back to the community.

The first pilot programme commenced in Wilayah Persekutuan with three implementation partners namely Bank Islam Malaysia Berhad (BIMB), Majlis Agama Islam Wilayah Persekutuan (MAIWP) and SME Corporation Malaysia (SME Corp).
B40 entrepreneurs face difficulties in accessing formal financial services for a number of reasons. Many are weighed down by lack of business and financial track records, inadequate business and financial management skills, and business activities that tend to be of higher risk. Through incorporating social finance features in financing solutions, B40 entrepreneurs can avail themselves of more funding options beyond debt-based financing to sustain or expand their business. Importantly, the upskilling, mentoring and impact-based monitoring of achievements further increase the likelihood of success in their business ventures and greater financial resilience over the longer term.

The effective implementation of the iTEKAD programme will continue to require strong commitment from all stakeholders as its delivery mechanism is more resource intensive compared to traditional ways of delivering finance.

Given the highly positive experience thus far, the iTEKAD programme will be further expanded in 2021 through the anticipated participation of two additional Islamic financial institutions. These Islamic financial institutions will be providing a wider range of blended financial solutions using a variety of social finance instruments such as cash waqf and sadaqah. The expansion of the iTEKAD programme will also include more states and new implementation partners who can support the effective delivery of the programme. This in turn will further extend Islamic financial institutions’ outreach in social development and resilience initiatives.

Diagram 8: Features and progress of the iTEKAD programme

**FEATURES OF iTEKAD**

iTEKAD is a comprehensive social finance programme for B40 micro-entrepreneurs that provides:

- **Microfinancing** (from zakat, cash waqf and donation)
- **Structured training and mentorship**
- **Social finance funding**

**COMPREHENSIVE CUSTOMER JOURNEY**

1. **On-boarding**
   - Direct applications, or identified by participating banks or implementation partners, e.g. State Islamic Religious Council
   - Eligibility is based on financial capability and risk profile

2. **Upskilling**
   - Participants undergo structured training in areas of business and financial management, such as:
     - Business ideas development
     - Accounting and financial management
     - Digital marketing
     - Communication and branding
     - Entrepreneurial ethics

3. **Funding**
   - Microfinancing facility (up to RM50,000) at 4% profit rate
   - Zakat contribution in the form of equipment, machinery and ICT tools

4. **Mentoring**
   - Participants carry out their business with ongoing support from implementing partners and business mentors
   - The business mentors will provide ongoing guidance for 12 months
   - Business mentors provide advisory services, mentorship and performance reporting

5. **Impact reporting**
   - Encompasses a broad range of performance indicators such as:
     - Amount of savings
     - Total business income
     - Number of jobs created
     - Growth of business assets
     - Zakat contribution

6. **Pay-it-forward**
   - Contributes back to the society by creating employment, paying zakat and empowering other B40 micro-entrepreneurs

**ACHIEVEMENTS IN 2020**

Implementation of iTEKAD through collaboration of Islamic banks with implementation partners resulted in

- 57 micro-entrepreneurs trained
- 24 business sectors*
- RM536,000 microfinancing disbursed
- RM42,000 zakat funds channelled

**IMPACT**

- **A B40 micro-entrepreneur from the fashion industry has grown her business**
  - 80% increase in business income within 8 months since March 2020
  - RM3,000 zakat received to purchase sewing machines and materials
  - RM10,000 microfinancing received to boost cashflow
  - 4 staff retained despite adverse impact of COVID-19
  - Embarked into online marketing

- **A school canteen operator revived her business**
  - 66% of pre-pandemic income regained within 2 months
  - RM7,000 microfinancing used to upgrade kitchen equipment and refurbish canteen
  - RM3,000 microfinancing dedicated to set up new online cakes and carpet business

- **A food entrepreneur retained her business despite a major downturn during the pandemic**
  - 68% of pre-pandemic income regained within 2 months
  - RM20,000 microfinancing received to purchase new materials, appliances and utility
  - 2 new freezers purchased to upgrade business capacity
  - 3 staff retained despite adverse impact of COVID-19

"iTEKAD is a breath of fresh air for my business. The financing provided useful working capital, while guidance from SME Corp is helpful for small businesses like us to survive through the challenges of the pandemic."

Operator of a school canteen business

"Beyond financing, iTEKAD provides useful guidance for small businesses to manage their business more systematically through the classes and training."

Owner of a restaurant specialising in traditional delicacies
Promoting a Progressive and Inclusive Islamic Financial System

**Promoting climate resilience**
The Bank also lent support to the role of Islamic finance in driving the sustainability and climate resilience agenda for the financial system. This is consistent with the fundamental values of Shariah to prevent harm and promote the attainment of benefits including safeguarding the environment. The intrinsic value of Islamic finance principles is universally applicable in realising a vision of economic growth that is balanced, sustainable and inclusive.

In 2020, we participated in developing detailed guidance (sectoral guides) with the industry via the VBI Community of Practitioners. These sectoral guides, which focus on palm oil, renewable energy and energy efficiency, as a start, will be finalised in the first quarter of 2021. This is part of the industry’s ongoing commitment towards the development of a financial system that supports sustainability and the transition towards a low carbon economy. These sectoral guides will facilitate the practical implementation of measures pursued by the Joint Committee on Climate Change (JC3), including the principles-based taxonomy (refer to Chapter 2.2 on “Towards a Greener Financial System”) and VBI Financing and Investment Impact Assessment Framework (VBIAF), that were issued in 2019. The sectoral guides outline the environmental, social and governance (ESG) risk considerations in specific economic subsectors/industries and activities. They serve as important tools to assist financing and investment decisions by financial institutions. In 2021, additional sectoral guides will be developed for the manufacturing, construction and infrastructure, as well as oil and gas sectors.

Takaful operators have also started to embrace VBI by aligning their corporate strategies and exploring improvements to business practices and operations. These actions aim to deliver a much bigger positive impact to the economy, community and environment. The development of the VBI framework for takaful is already at an advanced stage. The Malaysian Takaful Association (MTA) expects to issue the framework in early 2021 to guide the takaful industry on VBI adoption.

---

**Diagram 9: VBIAF Sectoral Guides as key tools to motivate behavioural change in the economy and society**

VBIAF Sectoral Guides provides guidance to financial institutions to incorporate environmental, social and governance (ESG) risk considerations in their financing and investment decision making process.

1. **Identify key issues of each ESG risk factor**
   - Environmental: Land use, biodiversity, water, pollution prevention, resource use efficiency, climate change & GHG emissions
   - Social: Labour rights, working conditions, health & safety, human rights and community relations
   - Governance: Alignment of business strategy & management structures

2. **Measure risks using appropriate metrics**
   - Yes: Greenhouse gas (GHG) emissions & pollution measures
   - Yes: Labour rights & sustainable community indicators

3. **Adopt risk management & mitigation**
   - Yes: Use of technology to track end-to-end sustainability status
   - Yes: Adequate protection via takaful & insurance covers

4. **Monitor & disclose targets/impact**
   - Yes: Progress towards low carbon & climate resilience
   - Yes: Impact on environmental & working conditions & standard of living of society
**Empowering trade, business and the digital economy**

The Bank collaborated with several Islamic banking institutions to explore the deployment of differentiated financial structures to facilitate the liquidity needs of SMEs at different stages of their business operations (Diagram 11). Given that these structures are relatively new to the industry, the Bank facilitated the development of the solutions by providing clarity on regulatory and reporting requirements.

In 2020, the Bank also focused on enhancing the digital marketplace to enable halal certified SMEs to participate in new markets. A key initiative is a strategic partnership between Islamic financial institutions and the Halal Development Corporation Berhad. This initiative aims to enhance access to financing and takaful protection for halal certified companies registered on the Halal Integrated Platform (HIP). HIP is an online digital advisory and networking platform targeting 5,000 halal certified SMEs and is set to be launched in 2021. In addition, the year saw three Islamic banks launch dedicated facilitation programmes for halal micro businesses and SMEs. These programmes include business advisory and business matching services that connect entrepreneurs to prospective buyers via an e-marketplace. With this initiative, Malaysia’s halal certified companies would have better market access and opportunity to expand their businesses in the global halal market space.
Takaful players have also pivoted innovatively in their offering of products and services amid COVID-19 challenges. Many have upgraded their self-service customer touchpoints and digitised system infrastructures to support takaful business operations and improve customer experience. In tandem with increasing consumer awareness on health protection, we have observed further expansion of digitally-enabled health care and preventive services such as telemedicine, wellness apps and wearables. Several digital offerings were introduced to cater for traditionally excluded segments as well. These include coverage for children with learning disabilities, usage-based protection and micro SMEs on e-commerce platforms.

In 2020, the Bank facilitated the admission of a peer-to-peer takaful model into the Financial Technology Regulatory Sandbox. This new takaful model based on ta’awun (mutual assistance) and wakalah bi al-ujrah (appointed manager with a fee) contracts is currently being live-tested for one year with a maximum of 10,000 participants. The offering is distributed through a mobile app. It provides death benefit coverage on a mutual assistance basis, involving equal sharing of the actual claims amount upon death among the participants. The mobile app also includes features such as simple on-boarding, nomination and claims processes for the convenience of participants.

</tbody>
</table>
Liquidity Facility for Government Vendors

The liquidity scheme is structured, on a pilot basis now, to ease cash flow constraints faced by businesses. It allows eligible SME vendors of public procurement contracts to obtain accelerated payment pending actual payment by the Federal Government. The scheme involves the sale or transfer of outstanding invoices owned by SME vendors to participating banks. The structure benefits SME vendors in the following ways:

- **Does not increase leverage of the vendors** given that the facility involves a true sale of payment rights on invoices to the bank, effectively transferring the payment claims from the vendors to the Principal. As such, under the facility, banks will have limited recourse on the vendors, unlike a financing or a loan structure; and

- **Competitive pricing** in view of the fact that the facility is provided based on the credit standing of the Government as the Principal instead of the credit assessment of the vendors.

The pilot will commence in the first quarter of 2021 involving four Islamic banking institutions and four participating Ministries. The Ministries involved are Ministry of Health, Ministry of Education, Ministry of Higher Education, and Ministry of Communications and Multimedia. These Ministries will act as the Principal parties, and the arrangement covers the supply and services contracts awarded by the Federal Government. Upon completion of the pilot programme, the scheme will be expanded to include participation of more banking institutions and Principals including those from the private sector. The scheme will also consider a wider range of contracts such as work-related procurement contracts as well as diverse types of facilities including pre-financing structures.

Diagram 12: Accelerated payment to Government SME vendors via the Pilot Liquidity Scheme¹

Implemented by tapping on existing infrastructure (i.e. Government procurement system and banks’ trade finance platform) for greater efficiency and accelerated time-to-market

- **SME vendor** performs contract awarded by the Government
- **SME vendor** submits invoices to Government
- **SME vendor** applies for funding facility to the bank based on invoices issued to Government
- **Bank** verifies invoices with Government
- **Bank** provides early payment to SME vendor
- **Upon invoice maturity**, Government pays the bank (instead of SME vendor) based on contract terms

Key Benefits to SME vendors

- **✓ Provides quick liquidity**, enabling SME vendors to better manage their financial requirements and advances to meeting new demands/orders
- **✓ Competitive pricing** based on standing of Government as Principal
- **✓ Does not affect gearing** of SME vendors
- **✓ Enhances accessibility** to banking facilities including for small enterprises
- **✓ No collateral** required

Notes:

¹ The pilot liquidity scheme known as CAKNA is a financing facility by Islamic banks for vendors that have obtained Government contracts for supplies and services.
We also strengthened engagements with government agencies and the business community, particularly in the halal industry, together with Islamic finance providers. For example, key information on Islamic finance solutions is now available in the Malaysia External Trade Development Corporation (MATRADE)’s Beginner’s Guide to Exporting, as well as Jabatan Kemajuan Islam Malaysia (JAKIM)’s Manual Prosedur Pensijilan Halal Malaysia (Domestik) 2020. This will help promote greater awareness and acceptance of Islamic financial solutions among halal certified companies.

**Going forward**

In 2021, we will continue our efforts to develop a progressive and inclusive Islamic financial system. We will sharpen our focus across three major areas, namely, social resilience, climate resilience and business empowerment. This will entail further diversification in Shariah-compliant financial solutions to address market gaps, and innovative approaches in meeting the evolving needs of the society and economy. These developments, together with the value-based focus of the industry, will contribute towards further strengthening the Islamic financial sector and enhancing its contribution to Malaysia’s socio-economic growth and development.
