BANK NEGARA MALAYSIA
CENTRAL BANK OF MALAYSIA

SIARAN AKHBAR

Ref. No.: 07/15/06

EMBARGO: Not for publication or broadcast before 1800 hours on Friday, 31 July 2015

MONETARY AND FINANCIAL DEVELOPMENTS JUNE 2015

Price Conditions: Headline inflation, as measured by the annual percentage change in the Consumer Price Index (CPI), increased to 2.5% in June (May: 2.1%). The increase was driven mainly by the upward adjustments in domestic fuel pump prices by 10 sen per litre, which translated into a smaller price decline on a year-on-year basis for the transport category (Jun: -1.4%; May: -4.7%). On a month-on-month basis, CPI increased by 0.6% in June (May: 0.4%). Excluding the impact from the increase in domestic fuel pump prices, CPI increased by 0.2%, consistent with the historical monthly average for the period 2010 – 2014.

Monetary Conditions: Interbank rates were stable in June. For the month as a whole, the 3-month KLIBOR was unchanged at 3.69%. In terms of retail lending rates, the average base rate (BR) of commercial banks was steady at 3.88%. Retail deposit rates were unchanged during the month. Net financing to the private sectors grew at a stable pace of 8.3% in June (May: 8.3%), driven by stable growth in outstanding banking system loans amidst moderation in the growth of net outstanding issuances of private debt securities (PDS). Outstanding business loans registered a stable annual growth, with outstanding loans to SME continued to grow strongly at 17.2% in June. Loans disbursed to businesses remained healthy with larger volume of loans extended mainly to the *wholesale and retail trade, restaurants and hotels; manufacturing; transport, storage and communication*; and

construction sectors. The annual growth of outstanding household loans continued to moderate to 8.7%. While this reflects slower growth in loans for the *purchase of non-residential property* and *securities*, loans for the *purchase of residential property* remained stable. Overall loan demand increased with higher loan applications during the month. On an annual basis, broad money (M3) growth increased to 6.0% in June. The expansion in M3 was driven mainly by the extension of credit to the private sector by the banking system. The expansion, however, was partially offset by a decline in net foreign assets following net capital outflows during the month.

Banking System: Banking system remained well capitalised with the Common Equity Tier 1 Capital Ratio, Tier 1 Capital Ratio and Total Capital Ratio at 12.3%, 13.1% and 15.2% respectively. The level of net impaired loans was sustained at 1.2% of net loans while loan loss coverage ratio remained high at 97.5%.

Exchange Rates and International Reserves: In June, the ringgit depreciated against the currencies of Malaysia's major trade partners. During the month, regional currencies including the ringgit faced downward pressure due to expectations of US interest rate normalisation during the second half of the year and uncertainties surrounding the developments in Greece. The ringgit was also affected by domestic-specific concerns. The international reserves of Bank Negara Malaysia amounted to RM379.4 billion (equivalent to USD100.5 billion) as at 15 July 2015, sufficient to finance 7.9 months of retained imports and were 1.1 times the short-term external debt[1].

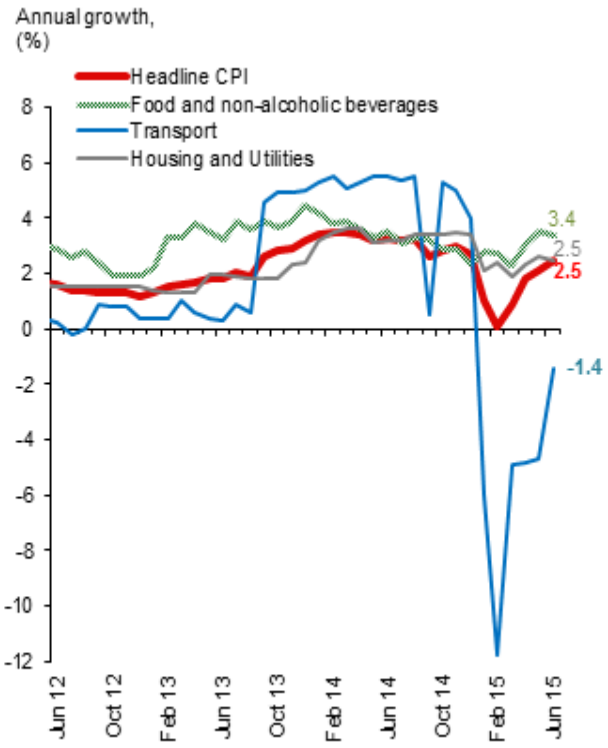

Bank Negara Malaysia
31 July 2015

[1] Refers to the redefined short-term external debt, which includes short-term offshore borrowing, non-resident holdings of short-term ringgit debt securities, non-resident deposits with the banking system and other short-term debt. For more information, please refer to the box article entitled 'The Redefinition of External Debt' in the Quarterly Bulletin on Economic and Financial Developments in the Malaysian Economy in the First Quarter of 2014.
